

MOVEit® Transfer

Industry-leading Managed File Transfer (MFT) Software

MOVEit Transfer Benefits:

- › Complete visibility and control over all file transfers.
- › Users can securely transfer and manage their own activities
- › Scalability and continuation of transfers after failures.
- › Compliance with data privacy laws and regulations such as HIPAA and PCI.
- › The consolidation of multiple FTP servers into one managed file transfer server.

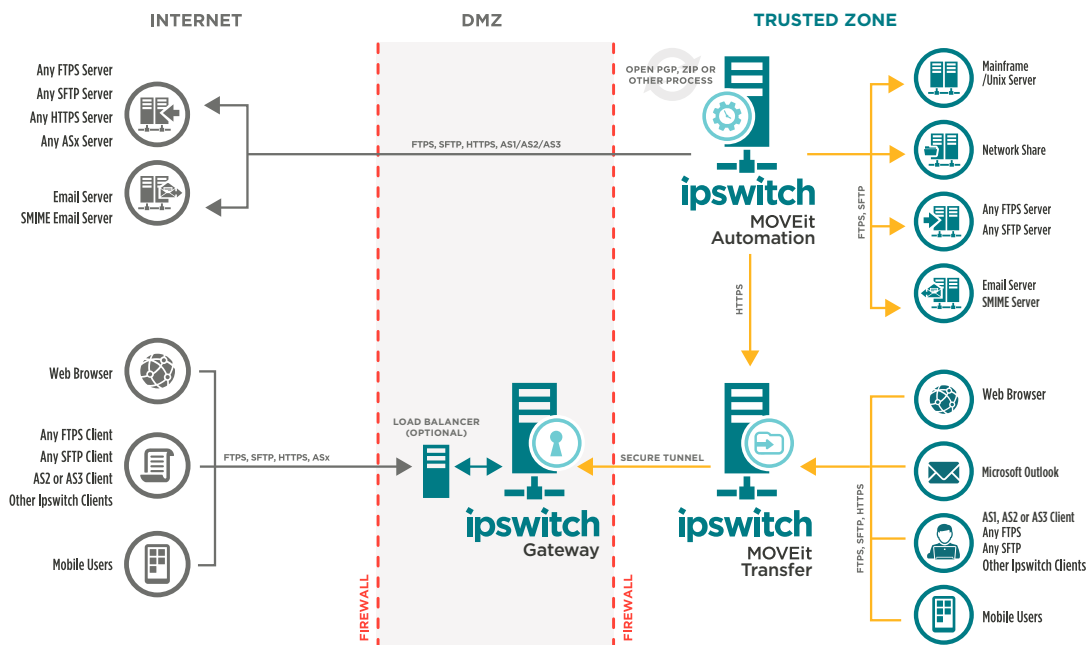

Get complete visibility and control over file transfer activities between partners, customers, users and systems. Secure files in transit and at rest and assure compliance with internal policies and regulatory mandates.

Enhanced Security and Compliance

Advanced security features include FIPS 140-2 validated AES-256 cryptography, users authorization / authentication, delivery confirmation, non-repudiation and hardened platform configurations. MOVEit Transfer logs activities in a tamper-evident database to comply with ISO 27001, HIPAA, PCI, GDPR, SOX, BASEL I/II/III, FIPS, FISMA, GLBA, FFEIC, ITAR and data privacy laws. It also integrates with your existing DLP and anti-virus systems, identity systems through SAML 2.0, AD, LDAP services, and SIEMs. Additionally MOVEit offers an API interface for other third-party applications.

Flexible Deployment and Access Options

A broad range of client options support mobile, web and Outlook access. MOVEit Transfer's flexible architecture supports scalability or availability demands with a web farm implementation. Domain-based or username-based multi-tenancy configurations are also supported.

NOTE: MOVEit Transfer is the new name for MOVEit DMZ and MOVEit Automation is the new name for MOVEit Central.

MOVEit Transfer Features

FILE TRANSFER PROTOCOLS

- › FTP
- › FTPS (SSL/TLS)
- › SFTP (SSH)
- › HTTP/S
- › SMTP / POP 3

SECURITY

- › Support for MySQL and SQL Server – MySQL included at no additional cost
- › AES 256-bit encryption of files both in-transit and at-rest
- › FIPS 140-2 validated cryptography
- › Tamper-evident database for logs
- › Encrypted Administrative Access
- › Tiered architecture enables distributed configuration across network domains
- › Cryptographic Tamper-Evident Logging
- › Automated rules for policy governance
- › Single sign-on

HIGH AVAILABILITY & FAILOVER

- › Increase performance with web farm deployment;
- › Automatic failover and disaster recovery with Ipswitch Failover

ADMINISTRATION

- › Pre-defined and customizable reports
- › Delegation of Permissions (Groups/Users)
- › Unlimited Simultaneous Local/Remote Users
- › Management of users, groups, folders, file-and user-aging policies
- › Email alerts

INTEGRATIONS

- › API for Custom Programming
- › Antivirus Solution Integration: McAfee, Symantec & Sophos
- › DLP integration: RSA, Symantec, and McAfee
- › Integrate to leading identity (IdP) systems: Microsoft ADFS, Shibboleth and Onelogin
- › Authenticate against external databases: Active Directory, LDAP, secure LDAP, Radius server or any ODBC-compliant database.

CLIENTS

- › Web transfer (Javascript)
- › Mobile (Android and iOS)
- › Outlook plugin
- › FTP clients
- › MOVEit EZ and MOVEit Freely

MOVEit TRANSFER EDITIONS	Standard	Professional	Premium
